safeBrake

recliners

accord[™]
the recliner that does

safeBrake grips the floor securely, delivering exceptional stability and makes a solid stop on uneven floors. An industry first, only Wieland separates the casters and brakes. Accord's dedicated brake system out-performs brake systems that are combined with the casters.

intelliTrac[™] casters auto-align and auto-release, offering the control to change direction quickly from straight to sideways. While the chair is tracking straight, a small nudge will move it sideways to help maneuver into tight spaces.

transfer arm
